Currently studying computer science at ENSEEIHT, I am looking for an internship to discover the job of a software developer in order to develop the skills that I have acquired during my studies.

Internships and Professional Experience

Observation Internship

Oct. 2018 | LCC CNRS, Toulouse

During this observation internship at a physics and chemistry laboratory center, I was able to discover what life in a company looks like, the importance of each profession for the cohesion of the company, and the significance of teamwork for projects. I was also able to nurture my scientific curiosity during this observation internship.

Skills acquired: teamworking, understanding, curiosity

Academic Background

Computer Sciences

Sept. 2024 - Today | ENSEEIHT, Toulouse

Classe Préparatoire

Sept. 2022 - June 2024 | Lycée Pierre de Fermat, Toulouse

Baccalauréat, European Section, with Distinction

Sept. 2019 - June 2022 | Lycée Sainte Marie De Nevers

Projects, Clubs, and Associations

Les Cordées de la Réussite

The aim of this association is to allow underprivileged youth to discover the engineering profession. During these sessions, we teach seven graders the basics of robotics and build connections to show them that the engineering profession is accessible to everyone.

Net7

I participated in training sessions of this club to learn the basics of HTML/CSS. The club offers useful projects for student life and for improvement.
